

Activity Sheet..... 5

Topic: Sedimentation & Nutrients

Name: _____

Water Testing

- Test the water quality in the following situations and describe your findings:

1. Straight from the tap. -

2. Water flowing over the quadrangle.

3. Water flowing over the school car park.

4. An area of eroded land on school site or nearby.

- Observe the differences in water quality and discuss the causes for any differences you identify.
